

DATASHEET

BENEFITS

Cost control Consolidates resources and eliminates the need for multiple stand-alone fax machines, modems, phone lines and supplies by centralizing RightFax Services at Canon imageRUNNER devices

Increased productivity and business efficiency RightFax Integration for MEAP allows users to print, scan, copy and fax on one consolidated imageRUNNER device right at the user interface (UI)

Enhanced security and compliance With the Canon UI one can select tamper-resistant document delivery as well as certified or encrypted email delivery options

Optimize IT infrastructure investments Optimizes through integrations with MEAP-enabled Canon imageRUNNER devices as well as email, document management, ERP, workflow and other applications to make a more efficient, connected work environment

Simplified deployment and management Centralizes document development, duplication and delivery functions on an integrated networked solution using RightFax Integration for MEAP and Canon imageRUNNER devices

Captaris® RightFax® Integration for MEAP

Dynamic Two-Way Integration Lets You Capture, Process, Deliver and Track Fax Documents Directly from Canon imageRUNNER® Devices

OVERVIEW

Captaris is a Canon Solution Provider improving business efficiency and optimizing IT infrastructure by giving the organization and user better control over document flow and security. RightFax Integration for MEAP tightly integrates with Canon imageRUNNER devices to consolidate faxing services on the network and provide users easy access to the extended document delivery features of RightFax directly at the Canon imageRUNNER.

As the first two-way dynamic integration of its kind, the RightFax integration for MEAP gives users both walk-up access and a central point of control for hard-copy and electronic faxing. It transforms paper-based documents to electronic format, delivers the documents via standard fax, certified email or encrypted PDF and provides notifications and history for fax tracking and audit trails. In conjunction with Canon imageRUNNER devices, it's the ideal solution for organizations that want a cost-effective, consolidated solution to electronically capture, process, deliver and track fax documents.

FEATURES

The new RightFax integration enables office workers to create and process fax jobs, then deliver and track the documents, all from the front panel. This is all made possible by two-way communication between the Canon imageRUNNER devices and the RightFax Server. The user-friendly interfaces enable office workers to select fax options, attach cover sheets, input billing codes, select document types, access RightFax phonebooks and more.

PRODUCT FEATURES	
Centralized management and administration tools	RightFax Integration for MEAP provides a configuration wizard and a set of management tools to ease deployment and ongoing management.
Intelligent outbound fax delivery from Canon imageRUNNER devices	Sends documents directly from a Canon imageRUNNER UI or from desktop and other business applications. Delivery options include call grouping, scheduling and priority sending
Flexible document delivery options at the imageRUNNER UI	Delivers scanned documents via standard fax, certified email and encrypted PDF using Canon's MEAP and Captaris RightFax technology. Certified email and encrypted PDF delivery require the RightFax Enterprise Suite.
Advanced sending features provided by MEAP and RightFax technology	At the UI, select RightFax user to access RightFax phonebooks, user accounts, library documents, cover sheets and scheduled delivery options at imageRUNNER devices
RightFax reporting, tracking and notifications available	Logs all data and actions for a faxed document as well as provides Canon users customizable notification option selection for audit trail and accountability
Annotated with billing codes	Select faxes to be annotated with billing codes for accounting purposes
First-page thumbnails on notifications to imagerUNNER	Provides first-page thumbnail of outbound faxes for tracking and identification printed with the notification back to the imageRUNNER device
Scalable platform	Allows organizations to easily expand MFP integrations, manage current MFPs allowing switching as needed, add MFP modules and more

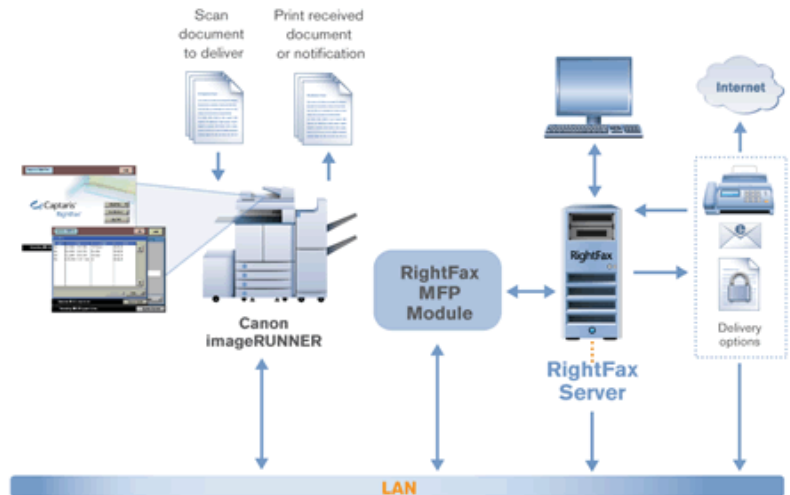

Captaris RightFax Integration for MEAP

HOW IT WORKS

Outbound Faxing Faxing a document with RightFax and a Canon imageRUNNER requires the RightFax Integration for MEAP, which includes the RightFax MFP Module Canon Connector and RightFax MEAP application. This integration enables dynamic two-way communication between Canon imageRUNNER devices and RightFax. As a result, digital documents can be built from paper documents directly at the device, processed and then delivered via fax, certified email or encrypted PDF using the RightFax Server. A user with a RightFax account can track fax history at the device UI or at their desktop.

Inbound Faxing An incoming fax arrives at the RightFax Server. From the RightFax Server, incoming faxes can be sent to the user's workstation to be viewed and manipulated. They can also be forwarded as email, saved to a document management system, Microsoft Windows filing system or output via the LAN to an imageRUNNER device. Faxing using the RightFax Integration for MEAP and MEAP-enabled Canon devices allows for easy data transfer.

RightFax Integration for MEAP
